In a few minutes, you will be read a list of ten words/concepts.

As you hear each word, estimate the number of vowels in each. Your task is to try and keep a running total of the average number of vowels in each word. At the end of the task. I will be asking you for the average number. Remember: This is a mental exercise. No writing!

In a few minutes, you will be read a list of ten words/concepts.

As you hear each term think about whether or not it relates to your classroom and the way you teach. If it does relate, think an example of how relates to your classroom. If you are not sure what the term means, think of a question you would like to ask about the new term. I will be asking you for your examples/questions. Remember: This is a mental exercise. No writing!
